

**Project Design Phase-I**  
**Solution Architecture**

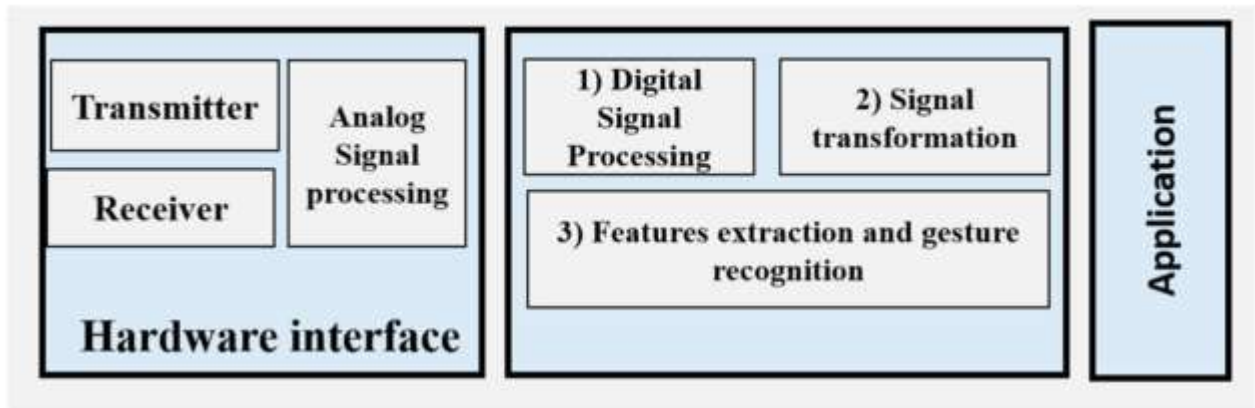

Date	05 October2022
Team ID	PNT2022TMID33174
Project Name	Project – A Gesture base tool for Sterile browsing of Radiology Images
Maximum Marks	4 Marks

**Solution Architecture:**

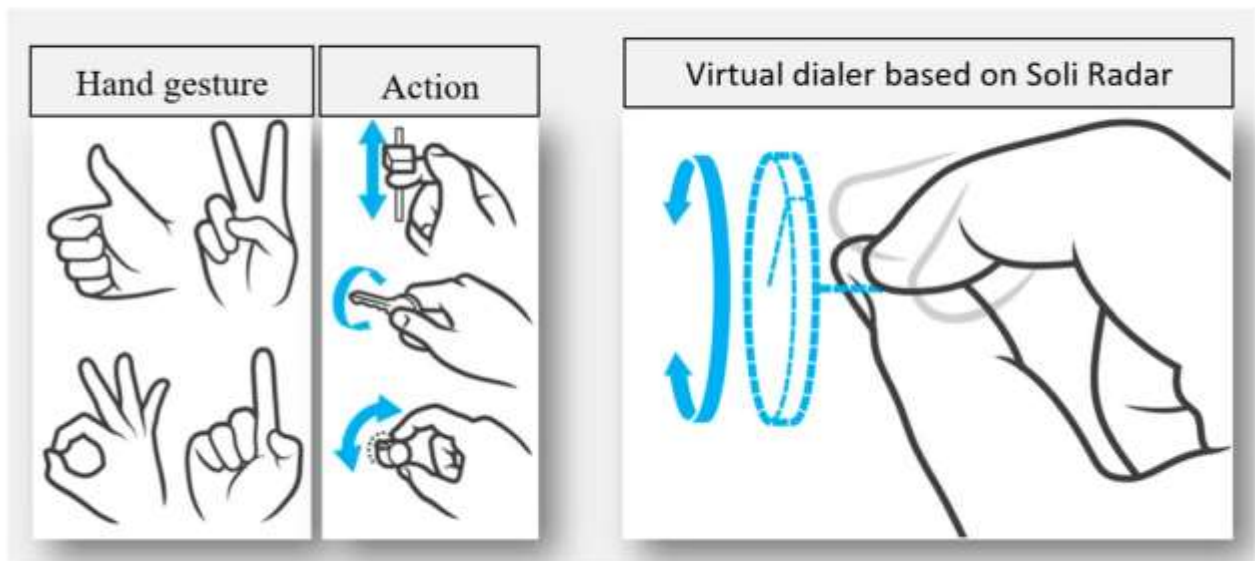

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

**Example - Solution Architecture Diagram:**
